

Safety Instructions for Loudspeakers

ICP Series

Intended Use

This loudspeaker is intended exclusively for sound reproduction in living spaces, including damp rooms. Only install and use the speaker as described in the operating instructions. Any other use (especially safety-related or medical applications as well as outdoor installation) is considered improper and may result in damage to property or personal injury.

Installation

- Do not expose to extreme moisture (spray and water jets)
- Do not expose to direct sunlight
- Do not expose to high temperatures, keep sufficient distance from heat sources (heaters, ovens, open fires and all appliances that generate heat)
- Do not expose to extreme cold

General Safety Precautions

- Ensure secure fastening in the ceiling or wall. The cladding of the ceiling/wall in which the speaker is to be installed must be sufficiently stable and firmly connected to the supporting substructure (minimum thickness for wood-based materials and plasterboard: 12 mm). Observe the installation instructions in the operating instructions.
- Avoid vibrations.
- Please ensure that the connection cables are laid safely. Cables must not be laid in the vicinity of traffic routes (areas where people are present or moving) or cross them.
- Magnetic components: Please keep objects that are sensitive to magnetism away or do not install the speakers near them (e.g. CRT televisions, hard disk drives, magnetic cards such as credit cards, etc.).
- Do not place the speakers in the immediate vicinity of network components (e.g. routers, repeaters) and devices with transformers. Electromagnetic interference can cause noise. Cell phones in the immediate vicinity can also cause noise.
- Do not use any aggressive cleaning agents containing alcohol or solvents or abrasive cleaning agents.
- Repair and maintenance work may only be carried out by qualified specialists.

Prevention of Hearing Damage

Prolonged exposure to sound at high volumes can cause hearing damage or even permanent hearing loss. Please read the following safety instructions before using the speakers.

- When you switch on the speakers, set the volume control to the lowest possible volume to start with.
- Slowly increase the volume to a level that is comfortable for you.
- Always try to keep the volume as low as possible.
- If you experience discomfort or if you notice ringing in your ears, it is advisable to stop using the speakers immediately.
